

"The system is cost effective and efficient and Cortex is responsive as your needs grow and change."

Dr. Shitabata's highlights:

- Overall ease of use
- Increased efficiency in completing necessary tasks decreases turnaround time
- Reports are completely electronic if desired
- The ability to customize final reports. "Our clients love our reports aesthetically."
- The seamless integration between the Gold AP and Medical Billing modules; each patient is accessioned only once
- "Cortex works with Zirmed, an excellent preferred vendor, adding to the seamless integration resulting in ease of billing and revenue management."
- The responsive support staff at Cortex. "Your LIS is only as good as the support...and the support staff at Cortex is outstanding."
- "There was one surprise benefit in particular; the Quality Management Reports built into the Cortex System that facilitate inspections and ensure compliance with regulations." These reports are generated from the patient and result data at the click of a button, saving a lot of time while meeting regulatory requirements.

In Summary

Cortex Live is a full featured, cost effective, efficient, scalable web based anatomical pathology management and medical billing system created and maintained by a company that is responsive to your needs both now and in the future.

Dermatopathology Institute recently upgraded to Version 9 of The Gold Standard and Cortex Medical Billing. Cortex makes it easy for their customers to stay on the latest version of the software. Part of the service Cortex offers: no additional cost for upgrades.
